## Ramaraj Sundraraj For Sports Officer

Hello everyone! My name is Ram, I'm a 1<sup>st</sup> year engineer from Churchill College and I've decided to run for Sports Exco for 2 reasons:

1. **I'm actively involved in sports as I enjoy it very much and I hope to get more people to be involved in it!**
2. **I would like to challenge myself as I have never organised sports events or sports-related activities before (I'm relishing the challenge of course!)**

My main sports are football and squash; however I also enjoy Frisbee, basketball, badminton, volleyball etc.

For me, past experiences do not matter as much as the will to improve when running for any position as I strongly believe one can 'grow' into the role with the right motivation and the drive for improvement. I believe I will bring exactly that to the table if elected.

My **main ideas** are:

1. **Organise a CUMaS family sports event. I was thinking of starting with something simpler to organise like badminton. I had the idea of creating a sports event involving pet families in my previous college but never had the opportunity to initiate it due to time constraints and other responsibilities. Hopefully I will be able to realise my idea this time and expand on it in the near future!**
2. **Have more friendlies with other societies. Playing in the indoor football tournament for CUMaS recently made me realise how fun it was to have a friendly match/game with other societies. I believe it's a great way to meet more people and enjoy sports at the same time.**

With that, comes the end of my manifesto. I give you my humble thanks for reading it. Regardless of whoever wins whichever post, I truly believe CUMaS has a bright future as there are many capable and great people in it.
