

Logistics Officer

Proposer : Ng Zhou Ling (St John's)

Seconder : Chua Chong Yew (Churchill)

If I can juggle being a NatSci with a number of committee positions, I think I can very well manage the “behind-the-scenes” coordination of an event, to ensure that everything runs smoothly.

I shall not dish out self-indulgent reasons / attributes as to why I should be chosen for the role, but I will instead list out the things I have done and let YOU decide whether I am suitable for the role.

Current Positions / Involvements

Cambridge Aspire Society (Secretary)

It is a relatively new society, and this means that I was involved in publicizing the society, organizing events, writing minutes, drafting constitutions etc.

CuNanoSoc (General Committee / Poster designer)

I have been designing posters for events organized by this society, often adhering to tight deadlines

Attempts on her Life Props Manager

I have been tasked with procuring props for the play, and I think that the props manager in a play is akin to the logistics officer in a society, essential but often overlooked.

***P.S. To “play with the freshers” (quoted from one of our current committee members) is actually one of the main reasons I’m applying for this role.**
