Contact Nummer : +44 7523316569  
Position running for : General Committee  
Proposer : Kaif Hilman – Christ College  
Seconder : Kok Zhi Hao – Fitzwilliam College

## Manifesto

As Cambridge students, we strive to excel in our academic performance and with a typical ‘kiasu’ spirit, we put huge effort to perform well in all exams (even if it is just a trial exam!). To become a competent employee however, it requires more than just 1<sup>st</sup> Class in our Tripos. Exposure to the outside world plays a pivotal role to ensure success in our future career.

The Speaker’s series which happened recently motivated me to run for the position of General Committee focusing on external relations. We have had speakers from the education and entrepreneurial industries which I believe have inspired many of us! I hope to do more than this. With CUMaS as the platform, I hope to approach prominent figures from a wide range of industries such as accounting, finance and engineering just to name a few. Through these series of talk, we will gain insights on the current development of various industries in Malaysia as well as to have an opportunity to socialise with the speakers. Some of the themes which I would want to explore include future of Energy sector in Malaysia and development of Malaysia economy. As ambitious as it might sound, I hope that I will be able to approach some politicians in Malaysia so that we get a chance to understand the direction Malaysia is heading towards as well as to personally ask them questions.

**Companies which I would like to approach :**

**PETRONAS**

**AND MANY MORE...**

I hope that through these talks, we can get more insights and keep in touch with the development of various industries in our country. These will, I believe, help us to become a more competent person in our future career.
